

- **Ábel Zoltán Balogh** is a master's student in Educational Sciences at the Faculty of Humanities and Social Sciences, University of Pécs. His research focuses on teacher abuse.
- **Ádám Fésüs** is a PhD student at the Doctoral School of Biology and Sport Biology, Faculty of Science, University of Pécs. His research focuses on biomechanics.
- **Ádám Végh** is a student at the Faculty of Law, University of Pécs. His research focuses on financial law.
- **Ádám Zsíros** is a master's student of History at the Faculty of Humanities and Social Sciences, University of Pécs. His research focuses on World War I memoirs.
- **Adrián Antal** is an undergraduate student in Biology at the Faculty of Science, University of Pécs. His research focuses on the effects of certain mycotoxins on the condition of wild species.
- **Adrián Antal** is an undergraduate student in Biology at the Faculty of Science, University of Pécs. His research focuses on agrobiolology.
- **Adrian Borna Bašić** is a medical student at the Faculty of Medicine, Josip Juraj Strossmayer University of Osijek. His research focuses on public health and environmental health issues.
- **Adrián Remete** graduated in History from the Faculty of Humanities and Social Sciences, University of Pécs. His research focuses on the second half of the 20th century (Rákosi and Kádár eras).
- **Adriána Kutás** is a master's student in Chemical Engineering at the Faculty of Materials and Chemical Engineering, University of Miskolc. Her research focuses on molecular biology and drug development.
- **Ágnes Ronyecz** is a student in the Bibliotherapy postgraduate program at the Faculty of Humanities and Social Sciences, University of Pécs. Her research focuses on social sciences.
- **Ágota Ábrahám** is a biologist at the National Laboratory of Virology, University of Pécs. Her research focuses on uncovering evolutionary patterns of the Lloviu virus.
- **Ágota Ábrahám** is a biologist at the National Laboratory of Virology. Her research focuses on virology.
- **Dr. Ákos Cservenák** is an associate professor at the Faculty of Mechanical Engineering and Informatics, University of Miskolc. His research areas include mechatronics, robotics, and intelligent material handling machines.
- **Dr. Ákos Gocsál** is an associate professor at the Faculty of Arts, University of Pécs, and a scientific researcher at the HUN-REN Research Center for Linguistics. His research focuses on phonetics and pedagogy.
- **Dr. Ákos Járay** is a radiologist at the Medical Imaging Clinic, University of Pécs. His research focuses on ultrasound diagnostics, particularly contrast-enhanced ultrasound.
- **Ákos Molnár** is a PhD student at the Doctoral School of Education and Society, Faculty of Humanities and Social Sciences, University of Pécs, and an assistant lecturer at the Institute of Sport Sciences and Physical Education, Faculty of Science, University of Pécs. His research focuses on educational sciences and sports science.
- **Dr. Alexandra Makai** is an assistant professor and researcher at the Faculty of Health Sciences, University of Pécs. Her research focuses on physical activity, health-related quality of life, and the development of reliable measurement tools applicable in health sciences.
- **Dr. Alexandra Vaczy** is an associate professor and researcher at the Department of Anatomy, Medical School, University of Pécs. Her research focuses on various retinal diseases.
- **Dr. Anamarija Soldo Koruga, PhD** works as a neurologist at the Clinical Center in Osijek, specializing in neurorehabilitation and neuroimmunology outpatient care at the Neurology Clinic. Her research area focuses on cognitive neuroscience and group decision-making.

- **András Béres** is a PhD student at the Doctoral School of Earth Sciences, Faculty of Science, University of Pécs. His research focuses on human geography, educational geography, and learner-centered methods in geography education.
- **András Darányi** is a PhD student at the Faculty of Engineering, University of Pannonia. His research focuses on supporting tool management using machine learning algorithms.
- **András Varga** is a master's student in Human Kinesiology and Physical Education Teacher Training at the Faculty of Science, University of Pécs. His research focuses on sports science.
- **András Varga** is an assistant lecturer at the Department of Anatomy, Medical School, University of Pécs. His research focuses on sports Psychology and exercise Physiology.
- **Dr. András Vizi** is a PhD student at the Doctoral School of Interdisciplinary Medical Sciences, University of Pécs. His research focuses on the effects of disinfectants on 3D-printed polymers and composites for medical device development.
- **Andrés Leiva Genre** is a PhD student at the Doctoral School of Physics, University of Pécs. His research focuses on the generation of intense, multi-cycle terahertz pulses and the development of terahertz dielectric accelerators.
- **Andrija Labaj** is a student at the Faculty of Medicine, Josip Juraj Strossmayer University of Osijek. His research focuses on oncology and clinical pharmacology.
- **Dr. Anett Kuczmog** is the Deputy Operational Director at the National Laboratory of Virology, University of Pécs. Her research focuses on cell signaling pathways induced by viral infections and the in vitro efficacy of antiviral compounds, particularly against SARS-CoV-2 and alphaviruses.
- **Anett Nagy** is a pharmacy student at the Faculty of Pharmacy, University of Pécs. Her research focuses on the antibacterial effects of essential oils against bacteria causing nosocomial infections.
- **Anita Eszter Frank** is a PhD student at the Doctoral School of Health Sciences, University of Pécs. Her research focuses on the relationship between inflammatory bowel diseases and the gut microbiome.
- **Anna Boróka Grósz** is a graduating architecture student at the University of Pécs. Her research focuses on the various connections between architecture and pedagogy.
- **Anna Hajdú** is a student at the Medical School, University of Pécs. Her research focuses on childhood obesity, its complications, and prevention strategies.
- **Anna Orsolya Laczkó** is a master's student in Biology at the Faculty of Science, University of Pécs. Her research focuses on experimental work related to mycotoxins.
- **Anna Padányi** is a PhD student, biologist, and scientific assistant at the Faculty of Science, University of Pécs. Her research focuses on examining cortical excitability using non-invasive electroencephalography and transcranial magnetic stimulation in non-human primates.
- **Anna Rozália Weisz** is a master's student in History at the Faculty of Humanities and Social Sciences, University of Pécs. Her research focuses on the dynastic relations and claimants to the throne in the medieval Kingdom of Hungary.
- **Dr. habil. Annamária Pakai** is an Assistant Professor at the Faculty of Health Sciences, University of Pécs. Her research focuses on health science.
- **Aranka Csonthó** is a PhD student at the Reformed Theological Faculty, J. Selye University. Her research area focuses on religious studies, particularly the relationship of religious individuals towards death.
- **Dr. Árpád Czéh** is a scientific researcher and head of the Department of Applied Molecular Sciences, University of Pécs. His research focuses on mycotoxins and flow cytometry.
- **Attila Jukić-Burai** is a medical student at the Faculty of Medicine, Josip Juraj Strossmayer University of Osijek. His research focuses on science, internal medicine, and pharmacology.

- **Attila Maill** is a history-Hungarian teacher training student at the Faculty of Humanities and Social Sciences, University of Pécs. His research focuses on the Hebrew Bible, specifically the Book of Esther, and its date of origin.
- **Attila Szücs** is a geography and physical education teacher training student at the Faculty of Science, University of Pécs. His research focuses on the health science aspects of sports.
- **Attila Vörös** is a PhD student at the Interdisciplinary Doctoral School, University of Pécs. His research focuses on the history of cinemas in Baranya County between 1945 and 1990.
- **Balázs Borjáti** is a PhD student at the Interdisciplinary Doctoral School, Faculty of Humanities and Social Sciences, University of Pécs. His research focuses on Judaic studies, local history, and urban history, particularly the history of the Jewish community in Szigetvár during the Dual Monarchy era.
- **Balázs Gáspár** is a PhD student at the Doctoral School of Biology and Sport Biology, Faculty of Science, University of Pécs. His research focuses on biomechanics.
- **Balázs Jakus** is an undergraduate student in History at the Faculty of Humanities and Social Sciences, University of Pécs. His research focuses on the social history and criminality during the Dual Monarchy period, as well as the local history of Pécs.
- **Balázs Mérész** is a PhD student at the Doctoral School of Theoretical Medical Sciences, Medical School, University of Pécs. His research focuses on the effects of bacterial toxin-induced and lipopolysaccharide-induced ocular inflammation and its potential treatment methods in rodent models, focusing on the anterior segment of the eye.
- **Balázs Pető** is a PhD student at the Doctoral School of Political Science, Faculty of Law, Eötvös Loránd University. His research focuses on the history of conservative thought, specifically the works of Joseph de Maistre (1753–1821), a French counter-revolutionary thinker.
- **Dr. Balázs Knakker** is a postdoctoral researcher, biologist, and scientific associate at the Faculty of Science, University of Pécs. His research focuses on the effects of electromagnetic radiation on physiological and cognitive processes.
- **Balázs Sebesi** is an assistant lecturer at the Faculty of Science, University of Pécs. His research focuses on biomechanics and sports science.
- **Bálint Borbándi** is a student in History and Civic Education Teacher Training and Library Sciences at the Faculty of Humanities and Social Sciences, University of Pécs. His research focuses on the representation of the Roma community in contemporary history textbooks.
- **Dr. Bálint Botz** is an assistant professor at the Medical School, University of Pécs, and a neuroradiologist at the Clinical Center, University of Pécs. His research area focuses on medical imaging.
- **Bálint Jurasits** is a master's student in Physics at the Faculty of Science, University of Pécs. His research focuses on laser physics.
- **Dr. Bálint Környei** is a resident physician at the Medical Imaging Clinic, University of Pécs. His research focuses on the investigation of diffuse axonal injury caused by head trauma using modern MRI imaging techniques.
- **Barbara Anita Bodnár** is a master's student in Educational Sciences at the Faculty of Humanities and Social Sciences, University of Pécs. Her research focuses on Peace Education and its relevance in Hungary.
- **Barbara Tóth** is a PhD student at the Doctoral School of Psychology, University of Pécs. Her research focuses on the psychology of collective threats, the system-justifying effects of threats, and the influence of the past on the present.

- **Barna Ivan** is a student at the Faculty of Medicine, Josip Juraj Strossmayer University of Osijek, and a member of the Neuroscience Student Section (SenzOS). His research area focuses on cognitive neuroscience and group decision-making.
- **Prof. Dr. Béla Illés** is a university professor at the Faculty of Mechanical Engineering and Informatics, University of Miskolc. His research areas include material handling machines, logistics systems, and logistics networks.
- **Dr. Béla Kocsis** is an associate professor and microbiologist at the Institute of Medical Microbiology and Immunology, University of Pécs. His research focuses on the molecular pathogenesis of infections, with particular attention to the application of molecular biological methods.
- **Prof. Dr. Béla Völgyi** is a university professor and head of the Department of Neurobiology, Faculty of Science, University of Pécs. His research focuses on the retina, ganglion cells, and gap junctions.
- **Bence Folyi** is a master's student in Aesthetics at the Faculty of Humanities and Social Sciences, University of Pécs. His research focuses on visual culture, art theory, and patristics.
- **Bence Gosztonyi** is an undergraduate biology student at the Faculty of Science, University of Pécs. His research focuses on monitoring studies of various protected and pest small mammal species.
- **Bence Péter Hári** is an undergraduate student in Earth Sciences at the Faculty of Science, University of Pécs. His research focuses on paleontology.
- **Bendegúz Pisch** is a master's student in International Studies at the Faculty of Humanities and Social Sciences, University of Pécs. His research focuses on the automated measurement of text difficulty levels in Russian texts.
- **Bernadett Babirák** is an undergraduate student in Biotechnology at the Faculty of Pharmacy, University of Pécs. Her research focuses on transport processes involving membrane nanotubes.
- **Bettina Kitti Salamon** is a master's student in Biology at the Faculty of Science, University of Pécs. Her research focuses on mycotoxin-producing filamentous fungi.
- **Bettina Trixler** is a student at the Doctoral School of Health Sciences, University of Pécs. Her research focuses on the healthcare of individuals with autism spectrum disorders.
- **Bianka Balga** is an English-Ethics Teacher Training student at the Faculty of Humanities and Social Sciences, University of Pécs. Her research focuses on twentieth-century and contemporary English prose.
- **Boglárka Balogh** is a PhD student at the Doctoral School of Biology and Sport Biology, Faculty of Science, University of Pécs. Her research focuses on the retina, microglia, and subretinal hemorrhage.
- **Borbála Nagy** is a student at the Faculty of Humanities and Social Sciences, Károli Gáspár University of the Reformed Church in Hungary. Her research focuses on history and educational sciences.
- **Dr. Brigitta Zana** is a scientific researcher at the National Laboratory of Virology (NLV). Her research focuses on virological studies.
- **Csaba Kisiván** is a PhD student at the Doctoral School of Religion, Culture, and Society, Babeş-Bolyai University, and a student of Paramedic Sciences at the Faculty of Health Sciences, University of Pécs. His research focuses on the validity of Franklian logotherapy in today's intellectual and cultural environment, with special attention to evangelization opportunities and youth pastoral care.
- **Dr. Csaba Melczer** is an assistant professor of health sciences at the Faculty of Health Sciences, University of Pécs. His research focuses on health science.
- **Csenge Sólyomvári** is a master's student in Biology at the Faculty of Science, University of Pécs. Her research focuses on physiology.

- **Csilla Madarász** is a master's student in Psychology at the Faculty of Humanities and Social Sciences, University of Pécs. Her research focuses on personality psychology.
- **Dániel Fenyő** is a PhD student at the Doctoral School of Literary and Cultural Studies, Faculty of Humanities and Social Sciences, University of Pécs. His research focuses on Hungarian neo-avant-garde literature.
- **Dr. Dániel Hanna** is a PhD student at the Doctoral School of Pharmacological and Pharmaceutical Sciences, University of Pécs, and a researcher at the National Laboratory of Virology. His research areas include UV inactivation, virus purification, vaccine development, and cellular immune response.
- **Dániel László Kovács** is a PhD student at the Interdisciplinary Doctoral School, Faculty of Humanities and Social Sciences, University of Pécs. His research focuses on the county elite.
- **Dániel Tóth** is a PhD student at the Faculty of Science, University of Pécs, and a scientific researcher at the Department of Ecology. His research focuses on the population dynamics of small mammals.
- **Dávid Csala** is a PhD student at the Faculty of Science, University of Pécs. His research focuses on the effects of resistance training on the extracellular vesicle profile.
- **Dr. Dávid Bognár** is a PhD student at the Medical Imaging Clinic, University of Pécs. His research focuses on the investigation of diffuse axonal injury caused by head trauma using modern MRI imaging techniques.
- **Dávid Kopunovic** is a master's student in Sociology at the Faculty of Humanities and Social Sciences, University of Pécs. His research area focuses on theoretical sociology.
- **Dávid Vince Simon** is a medical student at the Medical School, University of Pécs. His research focuses on the role of Hemokinin-1 in the pathophysiological processes of the central nervous system.
- **Prof. Dr. Dénes Molnár** is an emeritus professor at the Medical School, University of Pécs. His research focuses on the long-term effects of artificial fertilization on children's health, the epigenetic aspects, and the genetics, epigenetics, and hormonal background of childhood obesity and its metabolic complications.
- **Denisa Fógelová** is a medical student at the Medical School, University of Pécs. Her research focuses on the retina.
- **Diana Denes** is a PhD student and biotechnologist at the Department of Anatomy, Medical School, University of Pécs. Her research focuses on diabetic retinal disease.
- **Dominik Imre Szabó** is a medical student at the Medical School, University of Pécs. His research area focuses on robotic surgery.
- **Dominik Szieber** is an undergraduate Biology student at the Faculty of Science, University of Pécs. His research focuses on virology.
- **Dominika Rasztik** is an undergraduate Software Engineering student at the University of Pannonia and a researcher at the Industry 5.0 Lab. Her research focuses on applying artificial intelligence to analyse ergonomic data collected by sensors to reduce ergonomic risks in industrial environments.
- **Dóra Nagy** is a PhD student at the Doctoral School of Health Sciences, University of Pécs, as well as an assistant lecturer and scientific group leader at the National Basketball Academy in Pécs. Her research focuses on the practical application of spiroergometry.
- **Dr. Dóra Reglődi** is a university professor and head of the Department of Anatomy, Medical School, University of Pécs, as well as a lead researcher. Her research area is Neuroendocrinology, with a focus on investigating the protective role of the PACAP neuropeptide under physiological and pathological conditions.

- **Dorina Mirtill Vég** is a master's student in Clinical and Health Psychology at the Faculty of Humanities and Social Sciences, University of Pécs. Her research focuses on cognitive linguistics, with an emphasis on narrative psychology and its practical applications.
- **Dorina Puskás** is an undergraduate biology student at the Faculty of Science, University of Pécs. Her research focuses on the retina.
- **Dorottya Adrián** is a master's student in Physical Education Teacher Training at the Faculty of Science, University of Pécs. Her research focuses on swimming-based sports therapy.
- **Dorottya Luca Fehér** is a medical student at the Medical School, University of Pécs. Her research area focuses on the role of TRPA1 in the pathomechanism of toxic liver damage.
- **Dorottya Molitor** is a PhD student and biotechnologist at the Department of Anatomy, Medical School, University of Pécs. Her research focuses on retinopathy of prematurity.
- **Dorottya Molitor** is a PhD student at the Medical School, University of Pécs, and a member of the Retina Research Group at the Institute of Anatomy. Her research focuses on retinopathy of prematurity and the effect of maternal smoking on the disease.
- **Dorottya Szám** is a PhD student at the Doctoral School of Biology and Sport Biology, Faculty of Science, University of Pécs. Her research focuses on agrobiolgy.
- **Dorottya Szám** is a PhD student at the Faculty of Science, University of Pécs. Her research focuses on the occurrence of mold fungi on cultivated plants in relation to different climatic conditions.
- **Dr. Edina Pandur** is the head of the Department of Pharmaceutical Biology, Medical School, University of Pécs. Her research focuses on tumor biology and iron metabolism.
- **Dr. Edina Szabó** is a neurologist and associate professor at the Department of Anatomy, Medical School, University of Pécs. Her research focuses on glaucoma.
- **Dr. Edina Szabó-Meleg** is a senior lecturer at the Institute of Biophysics, Medical School, University of Pécs, and the head of the Membrane Nanotube Network Research Group. Her research focuses on the formation and function of membrane nanotubes as direct communication pathways between distant cells.
- **Elisabeth Garcia** is a medical student at the Medical School, University of Pécs. Her research focuses on colorectal surgery.
- **Emese Hargita Vörös** is a law student at the Faculty of Law, Eötvös Loránd University. Her research focuses on data protection law, administrative law, and constitutional law.
- **Dr. Emese Paári-Molnár** is a certified physicist and a researcher at the 3D Printing and Visualization Center, University of Pécs. Her research focuses on theoretical quantum optics, as well as the material analysis of polymers and composites used in 3D printing, and their applicability in medical technology.
- **Ena Kolak** is a student at the Faculty of Medicine, Josip Juraj Strossmayer University of Osijek. Her research area focuses on cognitive neuroscience and group decision-making.
- **Dr. Endre Czeiter** is a scientific researcher at the Medical School, University of Pécs. His research focuses on neurotrauma, traumatic brain injuries, brain physiology, and neuroimaging.
- **Enikő Makkai** is a PhD student at the Department of Applied Molecular Sciences, University of Pécs. Her research focuses on investigation of mycotoxins.
- **Erika Vadnai** is an undergraduate Hungarian language student at the Department of Hungarian Language and Literature, University of Novi Sad. Her research focuses on linguistics.
- **Ernesto González Cabrera** is a PhD student at the Faculty of Mechanical Engineering and Informatics, University of Miskolc. His research areas include warehousing, physical logistics, and vehicles.

- **Eszter Erzsébet Kun** is a student at the Doctoral School of Education and Society, University of Pécs, and a private singing teacher. Her research focuses on the communicative aspects of music learning and teaching.
- **Eszter Ósz** is a student of Physiotherapy at the Faculty of Health Sciences, University of Debrecen. Her research focuses on the effect of sport-specific posture on the posture, muscle flexibility, and joint range of motion in darts players.
- **Dr. Eszter Szabó** is a researcher at the National Laboratory of Virology, University of Pécs. Her research focuses on virus-host interactions and the in vitro investigation of the pathomechanisms of viral infections.
- **Eszter Tóth** is an undergraduate student in Biology at the Faculty of Science, University of Pécs. Her research focuses on retinal development.
- **Dr. Éva Erhardt** is a pediatrician, pediatric endocrinologist, and associate professor at the Medical School, University of Pécs. Her research focuses on various aspects of childhood obesity and diabetes mellitus.
- **Dr. Éva Petz** is a PhD student at the Department of Criminology and Penitentiary Law, Faculty of Law, University of Pécs. Her research focuses on child protection, administrative law, and criminology.
- **Dr. Éva Tékus** is an associate professor at the Department of Sports Medicine, Medical School, University of Pécs. Her research focuses on the examination of overtraining using various body fluids.
- **Evelin Derkács** is a scientific assistant at the Faculty of Science, University of Pécs. Her research focuses on sports science.
- **Evelin Ottrok** is a PhD student at the Doctoral School of Education and Society, Faculty of Humanities and Social Sciences, University of Pécs. Her research focuses on the past and present of oral storytelling traditions.
- **Evelin Patkó** is a biotechnologist with a PhD degree at the Department of Anatomy, Medical School, University of Pécs. Her research focuses on glaucoma.
- **Fanni Alexandra Ruppert** is a PhD student at the Interdisciplinary Doctoral School, Faculty of Humanities and Social Sciences, University of Pécs. Her research focuses on the study of "Orphic-Bacchic" gold tablets.
- **Fanni Dóra Kiss** is a medical student at the Medical School, University of Pécs. Her research focuses on the effects of long-term calorie restriction and 12-week treadmill training on leptin's central thermoregulatory responses in middle-aged male Wistar rats.
- **Fanni Napsugár Major** is a medical student at the Medical School, University of Pécs. Her research focuses on suicide.
- **Dr. Fanni Pólai** is a PhD student at the Institute of Translational Medicine, Medical School, University of Pécs. Her research focuses on the effects of long-term calorie restriction and 12-week treadmill training on leptin's central thermoregulatory responses in middle-aged male Wistar rats.
- **Ferenc Rómeó Fritz** is a pharmacy student at the Faculty of Pharmacy, University of Pécs. His research focuses on neurodegeneration and iron metabolism.
- **Dr. Gábor Almási** is a professor and vice dean of the Faculty of Science, University of Pécs. His research focuses on laser physics, electronics, terahertz lasers, and their applications.
- **Dr. Gábor Kemenesi** is an associate professor at the Faculty of Science, University of Pécs, and a researcher and head of the National Laboratory of Virology, University of Pécs. His research focuses, among other topics, on the evolutionary study of the Lloviu virus.
- **Dr. Gábor Kemenesi** is the director of the National Laboratory of Virology and an associate professor at the Faculty of Science, University of Pécs. His research focuses on virology.

- **Dr. Gábor Tamás Paragi** is a lecturer at the Institute of Physics, Faculty of Science, University of Pécs. His research focuses on molecular modeling and density functional theory.
- **Gabriella Bartalovics** is a student of Community Organization at the Faculty of Humanities and Social Sciences, University of Pécs. Her research focuses on mapping the cultural education staff of settlements in Baranya County in relation to learning and work.
- **Gabriella Kollárné Kiss** is an assistant lecturer at the Department of Sports Medicine, Medical School, University of Pécs. Her research focuses on musculoskeletal rehabilitation and sports physiotherapy.
- **Gabriella Laura Tóth** is an undergraduate student in Biology at the Faculty of Science, University of Pécs. Her research focuses on regeneration.
- **Gabriella Margit Kolonics** is an undivided teacher training student in Geography and History at the Faculty of Science, University of Pécs. Her research focuses on the transformation of natural and economic conditions in the Carpathian Basin in the 19th century.
- **Gergely Tóth** is a PhD student at the Faculty of Science, University of Pécs. His research focuses on ground-state density functional theory.
- **Gergő Illés** is a PhD student at the Doctoral School of Physics, University of Pécs. His research focuses on physical chemistry simulations.
- **Gergő Sipka** is a PhD student at the Doctoral School of Educational Sciences, University of Pécs. His research focuses on subject didactics.
- **Ghunaim Jood** is a medical student at the Medical School, University of Pécs. Her research focuses on clinical trials related to the ketogenic diet.
- **Gréta Varga** is a master's student in Biology at the Faculty of Science, University of Pécs, and a researcher at the National Laboratory of Virology (NLV). Her research focuses on virological studies.
- **Dr. Gyöngyvér Prisztóka** is an associate professor at the Institute of Sport Sciences and Physical Education, Faculty of Science, University of Pécs. Her research focuses on educational sciences and sports science.
- **Dr. György Masszi** is a pediatrician, pediatric cardiologist, and head of the Pediatric Cardiology Department at the Pediatric Clinic in Pécs. His research focuses on pediatrics.
- **Dr. György Thuróczy** is the head of the Non-Ionizing Radiation Department, Division of Radiobiology and Radiation Health, National Public Health and Pharmaceutical Center. His research focuses on the biological and health effects of electromagnetic fields (EMF).
- **Dr. Győző Horváth** is an associate professor at the Faculty of Science, University of Pécs. His research focuses on monitoring studies of various protected and pest small mammal species. **Gábor Bohár** is a department engineer at the Department of Systems Engineering, University of Pannonia. His research focuses on developing risk intelligence-based predictive models that identify and predict system risks using data-driven AI and machine learning, supporting early intervention.
- **Henriett Halász** is an assistant lecturer at the Institute of Biophysics, Medical School, University of Pécs. Her research focuses on the study of membrane nanotubes formed between distant cells.
- **Henrik Hubert** is a master's student in Philosophy at the Faculty of Humanities and Social Sciences, Eötvös Loránd University. His research focuses on philosophy of language, social philosophy, and philosophy of science.
- **Dr. Inez Bosnyák** is a PhD student at the Medical School, University of Pécs. Her research focuses on retinal damage following unilateral carotid occlusion.

- **Dr. István Hernádi** is a professor of neurobiology and lead researcher at the Department of Neurobiology, Institute of Biology, Faculty of Science, University of Pécs. His research focuses on developing preclinical models of neurocognitive diseases.
- **Ivett Majoros** is a master's student in Recreation at the Faculty of Science, University of Pécs. Her research focuses on sports psychology.
- **Ivona Hlaj** is a graduate student-researcher at the Department of Biology and the Faculty of Medicine, Josip Juraj Strossmayer University of Osijek. Her research focuses on the application of brain glycolipids and neural networks in biological and biomedical sciences.
- **Janina Zilai** is a healthcare management student at the Institute of Health Insurance, Faculty of Health Sciences, University of Pécs. Her research focuses on health science.
- **Dr. János Hebling** is a professor and researcher at the Department of Experimental Physics, University of Pécs. His research focuses on terahertz physics, spectroscopy, laser physics, nonlinear optics, and the generation and application of terahertz pulses.
- **Prof. Dr. János Matkó** is a professor emeritus at the Department of Immunology, Faculty of Science, Eötvös Loránd University. His research focuses on cellular communication mechanisms and changes in the membrane lipid composition of cellular extensions involved in these processes.
- **Judit Horváth** is an undergraduate student in Software Engineering at the Faculty of Information Technology, University of Pannonia. Her research focuses on optimizing multi-agent collaboration and machine maintenance scheduling.
- **Júlia Müller** is a medical student at the Medical School, University of Pécs. Her research focuses on modeling stress-induced pain.
- **Kálmán Fábrián** is a medical student at the Medical School, University of Pécs. His research focuses on diffusion tensor MRI, MALDI-TOF imaging, and space medicine.
- **Kata Kumli** is an undergraduate student in Psychology at the Faculty of Humanities and Social Sciences, University of Pécs. Her research focuses on changes in state anxiety under the influence of various humorous visual stimuli.
- **Dr. Katalin Ósz** is an associate professor at the Department of Physical Chemistry and Materials Science, Institute of Chemistry, Faculty of Science, University of Pécs. Her research focuses on photochemistry.
- **Katalin Szerb** is a student of Healthcare Management and Gastroenterological Dietetics at the Faculty of Health Sciences, University of Pécs. Her research area focuses on supporting the development of healthy eating habits and the health impacts of dietary practices.
- **Kazushi Ogasawara** is a medical student at the Medical School, University of Pécs. His research focuses on the investigation of TRPV-1 receptors and TRPA-1 channels.
- **Kinga Dávid** is a student of the Biology-Hungarian Teacher Training Program at the Faculty of Sciences, University of Pécs. Her research area focuses on testing compounds with anti-epileptic effects.
- **Kinga Kardos** is a biologist and physicist, and a PhD student at the Doctoral School of Interdisciplinary Medical Sciences, University of Pécs. Her research focuses on the material testing of polymers and composites used in 3D printing and their applicability in medical technology.
- **Dr. Kitti Garai** is an assistant professor at the Faculty of Pharmacy, University of Pécs. Her research focuses on the complex comparative analysis of blood cells from regular athletes and lung cancer patients.
- **Dr. Kornélia Bodó** is a postdoctoral researcher at the National Laboratory of Virology. Her research focuses on virology.

- **Luca Várallai** is a PhD student at the Doctoral School of General Jurisprudence, University of Pécs. Her research focuses on the intersection of energy and ESG, with a particular emphasis on the importance of responsible corporate governance in the energy sector.
- **Luis Nasi** is a PhD student at the Doctoral School of Physics, University of Pécs. His research focuses on experimental and computational methods for the study and analysis of terahertz lasers.
- **Luka Popovic** is a medical student at the Medical School, University of Pécs. His research area focuses on the role of TRPA1 in eye damage.
- **M. Johanna Vojcsik** is a PhD student at the Interdisciplinary Doctoral School, University of Pécs. Her research focuses on the relationship between the Holocaust and forced labor.
- **Prof. Dr. Maja Miškulin** is a professor at the Faculty of Medicine, Josip Juraj Strossmayer University of Osijek. Her research focuses on epidemiology, public health, preventive medicine, and environmental health.
- **Marcel Schmidt** is a medical student at the Medical School, University of Pécs. His research focuses on the morphology of neurodegenerative diseases.
- **Dr. Marian Ambrozy** is a researcher and associate professor at the College of International Business ISM in Slovakia. His research focuses on philosophy.
- **Marianna Madarász** is a history student at the Faculty of Humanities, University of Novi Sad. Her research focuses on the late 19th century and the early decades of the 20th century.
- **Prof. Dr. Marija Heffer** is a professor and head of the Department of Medical Biology and Genetics at the Faculty of Medicine, Josip Juraj Strossmayer University of Osijek. Her research focuses on the neurochemical role of brain glycolipids, particularly gangliosides, in brain development, maturation, regeneration, as well as the effects of stress and nutrition.
- **Mario Oršolić** holds a master's degree in kinesiology and teaches physical education at Josip Juraj Strossmayer University in Osijek. His research focuses on kinesiology and public health.
- **Dr. Márk Váczi** is an associate professor at the Faculty of Science, University of Pécs. His research focuses on biomechanics.
- **Márta Zsoldos** is a PhD student at the Doctoral School of Health Sciences, University of Pécs. Her research area focuses on sexology and music.
- **Prof. Dr. Márta Wilhelm** is a university professor at the Faculty of Science, University of Pécs. Her research focuses on exercise physiology, cell biology, and neuroimmunology.
- **Máté Maurer** is a PhD student at the Faculty of Science, University of Pécs. His research focuses on the dietary habits of wild species.
- **Máté Szünstein** is a PhD student at the Faculty of Science, University of Pécs. His research focuses on monitoring studies of various protected and pest small mammal species.
- **Mátyás Kiss** is a PhD student at the Doctoral School of Physics, University of Pécs. His research focuses on extreme ultraviolet (XUV) lasers.
- **Mátyás Mészáros** is a PhD student at the Doctoral School of Neurosciences, University of Pécs. His research area focuses on suicide.
- **Dr. Miloš Štefanovský** is an associate professor at the Faculty of Physical Education and Sport, Comenius University in Bratislava. His research focuses on active aging through combat sports, weight reduction, hydration, injury prevention, optimization of training intensity, and long-term athletic development.
- **Dr. Mónika Madai** is a scientific researcher at the National Laboratory of Virology. Her research focuses on the study of hantaviruses within virology.

- **Natália Plunárová** is a physiotherapy student at the University of Ss. Cyril and Methodius in Trnava. Her research focuses on improving the functional status and quality of life of children with chronic or congenital diseases.
- **Nicole Hunter** is a medical student at the Medical School, University of Pécs. Her research area focuses on the ketogenic diet.
- **Noel Szörcsök** is a mathematics-physics teacher training student at the Faculty of Science, University of Pécs. His research focuses on electromagnetism.
- **Noémi Hajma** is an undergraduate student in Psychology at the Faculty of Humanities and Social Sciences, University of Pécs. Her research focuses on end-of-life studies.
- **Nóra Dalma Minorics** is a master's student in Physics at the Faculty of Science, University of Pécs. Her research focuses on computer-based molecular modeling.
- **Nóra Szeszák** is a master's student in Psychology at the Faculty of Humanities and Social Sciences, University of Pécs. Her research focuses on the impact of childhood relationships and adult emotional reflection on the development of emotion recognition in children.
- **Norbert Dudás** is a student of Architecture at the Faculty of Engineering and Information Technology, University of Pécs. His research focuses on the relationship between architecture and artificial intelligence.
- **Norbert Viktor Dömös** is a student of the English-Physical Education Teacher Training Program at the Faculty of Humanities and Social Sciences, University of Pécs. His research focuses on the use of innovative technologies in sports.
- **Oleh Shynkarenko** is a PhD student at the Institute of Philosophy, Faculty of Humanities and Social Sciences, University of Pécs. His research focuses on the development of Ukrainian science fiction and its relation to the rise and fall of the positivist worldview.
- **Orsolya Kovács** is a medical student at the Medical School, University of Pécs. Her research focuses on the cytoplasmic and nuclear activity of ex vivo ectocervical cells.
- **Orsolya Péterfi** is a Chemistry Teacher Training student at the Faculty of Science, Eötvös Loránd University. Her research focuses on the history of settlements and families in Marosszék from the 17th to the 19th century.
- **Panna Lukács** is a master's student in Chemistry at the Faculty of Science, University of Pécs. Her research focuses on photochemistry.
- **Patricia Szántóri** is an assistant lecturer and PhD student at the Institute of Nutrition Science and Dietetics, Faculty of Health Sciences, University of Pécs. Her research focuses on nutrition science.
- **Patrik Ivusza** is a student in Geography and Physical Education Teacher Training at the Faculty of Science, University of Pécs. His research focuses on training theory.
- **Péter Márk Mieth** is a master's student in History at the Faculty of Humanities and Social Sciences, University of Pécs. His research focuses on Hungarian military strategy and tactics in the 13th–14th centuries, as well as the military history of the Crimean War (1853–56).
- **Péter Márk Nani Godadze** is a physics student at the Faculty of Science, University of Pécs. His research focuses on physics education.
- **Dr. Péter Maróti** is a medical doctor and associate professor, serving as the Deputy Director of the Medical Skills Development and Innovation Center, Medical School, University of Pécs. His research focuses on the applicability of materials used in 3D printing for medical technologies, particularly in the development of neurorehabilitation devices.
- **Dr. Péter Nagy** is a pediatrician and pediatric cardiologist. His research focuses on childhood obesity and cardiovascular risk factors.

- **Péter Nagy** is a PhD student at the Interdisciplinary Doctoral School, University of Pécs. His research focuses on 18th–20th-century history and the space race.
- **Dr. Péter Petrovics** is an associate professor at the Institute of Sport Sciences, Faculty of Science, University of Pécs. His research focuses on sports biology.
- **Péter Szabó** is a student of the English-Physical Education Teacher Training Program at the Faculty of Humanities and Social Sciences, University of Pécs, and a researcher at the National Laboratory of Virology. His research areas include UV inactivation, the psychological and neurological effects of combat sports, and the relationship between oxytocin and physical exercise.
- **Péter Závodi** is an undergraduate pharmacy student at the Faculty of Pharmacy, University of Pécs. His research focuses on circadian rhythm, its patterns in emergency care, and its significance.
- **Petra Bondor** is a medical student at the Medical School, University of Pécs. She conducts her research at the Medical Imaging Clinic, Clinical Center, University of Pécs. Her research area focuses on medical imaging.
- **Petra Schenk** is a pharmacy student at the Faculty of Pharmacy, University of Pécs. Her research focuses on tumor biology and iron metabolism.
- **Ramóna Kitti Szrés** is a student of the English-Hungarian Teacher Training Program at the Faculty of Humanities and Social Sciences, University of Pécs. Her research area focuses on teaching and learning methodology and knowledge technology.
- **Dr. Ramóna Pap** is an assistant professor at the Department of Pharmaceutical Biology, Faculty of Pharmacy, University of Pécs. Her research focuses on neurodegeneration and iron metabolism.
- **Rebeka Petrák** is a medical student at the Medical School, University of Pécs. Her research focuses on alleviating chronic stress-induced pain through interleukin-1 receptor inhibition in a fibromyalgia mouse model.
- **Regina Felső** is a biobank coordinator and scientific researcher. Her research focuses on the relationships between childhood nutrition, obesity, and sleep.
- **Regina Papp** is a PhD student at the Interdisciplinary Doctoral School, University of Pécs. Her research focuses on aspects of folk religiosity.
- **Richárd Morvai-Rácz** is a history student at the Faculty of Philosophy, University of Novi Sad. His research focuses on enlightened absolutism and the era of dualism.
- **Richárd Szita** is an undergraduate student at the Faculty of Information Technology, University of Pannonia. His research focuses on optimization.
- **Rita Márkus** is a former PhD student at the Faculty of Science, University of Pécs. Her research focuses on plant genetics and plant physiology studies.
- **Dr. Róbert Paic** is an assistant professor and head of department. His research focuses on educational science.
- **Dr. Roland Hetényi** is a researcher at the National Laboratory of Virology, University of Pécs. His research areas include UV inactivation of viruses, analysis of humoral immune response, and vaccine component development.
- **Roland Németh** is a PhD student at the Interdisciplinary Doctoral School, University of Pécs, and an archaeologist-museologist at the Directorate of Museums of Zalaegerszeg. His research focuses on Roman archaeology, the topography and infrastructure of the Amber Road, and archaeological photogrammetry.
- **Roland Told** is a physicist and head of the 3D Printing and Visualization Center at the University of Pécs. His research focuses on polymer and metal printing and their applicability in medical technology.

- **Sándor Konkoly** is a PhD student at the Doctoral School of Earth Sciences, Faculty of Science, University of Pécs. His research focuses on historical geography.
- **Sara Bonet** is a student at the Faculty of Medicine, Josip Juraj Strossmayer University of Osijek. Her research focuses on neuroscience and molecular biology, particularly the role of brain glycolipids in nervous system development and diseases.
- **Sára Kárpáti** is an undergraduate student in Psychology at the Faculty of Humanities and Social Sciences, University of Pécs. Her research focuses on changes in state anxiety under the influence of various humorous visual stimuli.
- **Sarolta Tar** is a PhD student at the Doctoral School of Clinical Medical Sciences, Medical School, University of Pécs. Her research focuses on predicting overtraining and overreaching using non-invasive methods, such as salivary steroid hormones.
- **Soma Csondor** is a PhD candidate at the Doctoral School of Literary and Cultural Studies, University of Pécs. His research focuses on the oeuvre of Szilárd Borbély.
- **Stipe Vidović** is a physician at the "Dr. Juraj Njavro" National Memorial Hospital in Vukovar. His research focuses on neuroscience and surgery.
- **Dr. Szabolcs Turnár** is an associate professor at the University of Pécs. His research focuses on the generation of terahertz pulses and their application in particle accelerators.
- **Szabrina Győri** is an undergraduate Psychology student at the Faculty of Humanities and Social Sciences, University of Pécs, and a junior research laboratory assistant. Her research focuses on the physiological effects of 5G electromagnetic radiation.
- **Szilárda Lili Hütter** is a master's student in Pharmacy at the Faculty of Pharmacy, University of Pécs. Her research focuses on the microbiological analysis of essential oils.
- **Dr. Szilvia Bokor** is a pediatrician, pediatric endocrinologist, and clinical adjunct professor at the Medical School, University of Pécs. Her research focuses on the long-term effects of childhood and prenatal nutrition, as well as artificial fertilization on children's health, with an emphasis on epigenetic background analysis.
- **Szonja Erdene Temulin** is a lecturer at the Department of Sports Medicine, Medical School, University of Pécs. Her research focuses on the effects of animal-assisted activities on athletes' mental health.
- **Tamara Papp** is a scientific assistant at the Institute of Chemistry, University of Pécs. Her research involves studying catalytic chemical processes using quantum chemistry methods.
- **Dr. Tamás Atlasz** is the Director of the Institute of Sport Sciences at the Faculty of Science, University of Pécs. His research focuses on sports science and physical education.
- **Dr. Tamás Gál** is an associate professor and head of the Department of Theoretical Physics, Institute of Physics, Faculty of Science, University of Pécs. His research focuses on ground-state and time-dependent density functional theory, and constrained functional differentiation and its applications.
- **Dr. Tamás Kégl** is a lecturer at the Department of General and Inorganic Chemistry, University of Pécs. His research focuses on theoretical chemistry.
- **Dr. Tamás Kovács-Öller** is a scientific researcher at the Faculty of Science, University of Pécs. His research focuses on the retina, ganglion cells, microglia, traumatic brain injury, and gap junctions.
- **Tamás Pintér** is a PhD student at the Interdisciplinary Doctoral School, Faculty of Humanities and Social Sciences, University of Pécs, a lecturer, and an assistant archivist at the Baranya County Archives of the Hungarian National Archives. His research focuses on 18th–19th century Hungarian history, with particular attention to the officials of Baranya County between 1790–1850.

- **Dr. Tamás Ruppert** is an associate professor at the University of Pannonia, head of the Industry 5.0 Laboratory, head of the Department of Systems Engineering, and deputy head of the Complex Systems Monitoring Research Group. His research focuses on Operator 4.0, with expertise in activity recognition, discrete event simulators, and human-centered solutions.
- **Tamás Varga** is a PhD student at the Doctoral School of Earth Sciences, Faculty of Science, University of Pécs. His research focuses on the role and significance of festival tourism in the South Transdanubian region.
- **Tessza Regina Győri** is an undergraduate biology student at the Faculty of Science, University of Pécs. Her research focuses on the prognostic role of D-Dimer during COVID-19 infection.
- **Tibor Kovács** is a student in Geography-History Teacher Training at the Faculty of Science, University of Pécs. His research focuses on the role and significance of Elemér Soltra in the fine arts of Pécs.
- **Dr. Tibor Mintál** is an associate professor at the Department of Sports Medicine, Medical School, University of Pécs. His research focuses on injury prevention, cartilage replacement, and ligament reconstruction.
- **Tibor Szabó** is a PhD student at the Doctoral School of Earth Sciences, Faculty of Science, University of Pécs, and a historian-museologist at the Völgység Museum. His research focuses on the history and religious geography of Bahá'í communities.
- **Dr. Tibor Tamás Hortobágyi** is a senior scientific researcher at the Faculty of Science, University of Pécs. His research area focuses on movement science.
- **Dr. Tuan-anh Tran** is an Industrial Engineering researcher at the Industry 5.0 Lab, University of Pannonia. His research focuses on data analysis in operational management in manufacturing from a systems engineering perspective, facilitating the application of Operator 4.0 and the transformation of Lean 4.0.
- **Valentin Kugler** is an undergraduate student in Chemistry at the Faculty of Science, University of Pécs. His research focuses on homogeneous catalysis.
- **Vanessza Malmos** is a student in English Language and Culture and Mathematics Teacher Training at the University of Pécs. Her research focuses on mathematics teaching methodology.
- **Viktória Anna Sággy** is a student in the History-English Teacher Training Program at the Faculty of Humanities and Social Sciences, University of Pécs. Her research focuses on 19th-century diplomatic history.
- **Viktória Bíró** is a laboratory technician and researcher at the Faculty of Pharmacy, University of Pécs, as well as a master's student at the Faculty of Health Sciences, University of Pécs. Her research focuses on the antibacterial activity of essential oils.
- **Viktória Gulyás** is a student of Hungarian Language and Literature at the Faculty of Philosophy, University of Novi Sad. Her research focuses on ethnography.
- **Dr. Viktória Lilla Balázs** is an assistant professor at the Institute of Pharmacognosy, Faculty of Pharmacy, University of Pécs. Her research focuses on the antibacterial and biofilm-inhibitory effects of essential oils and their components.
- **Viktória Szellár** is a master's student in Biology at the Faculty of Science, University of Pécs. Her research focuses on theoretical medical science.
- **Viktória Tárnai** is a PhD student at the Doctoral School of Interdisciplinary Medical Sciences, Medical School, University of Pécs. Her research focuses on the formation and function of membrane nanotubes as direct communication pathways between distant cells.

- **Zsanett Hont** is a PhD student at the Doctoral School of Earth Sciences, Faculty of Science, University of Pécs, and a master's student in Management and Organization at the Faculty of Business and Economics. Her research focuses on the impact of Chinese foreign direct investments on regional development in Hungary.
- **Zsófia Ambach** is a student of the English-French Teacher Training Program at the Faculty of Humanities and Social Sciences, University of Pécs. Her research area focuses on teaching and learning methodology and knowledge technology.
- **Dr. Zsófia Lanszki** is a researcher at the National Laboratory of Virology and an assistant professor at the Faculty of Science, University of Pécs. Her research focuses on virology.
- **Dr. Zsófia Lanszki** is an assistant professor at the Faculty of Science, University of Pécs, and a researcher at the National Laboratory of Virology, University of Pécs. Her research focuses on uncovering evolutionary patterns of the Lloviu virus.
- **Zsófia Molnár** is a student of Medical Diagnostic Analysis at the Faculty of Health Sciences, University of Pécs. Her research focuses on contrast-enhanced ultrasound.
- **Dr. habil. Zsófia Molnár-Kovács** is an associate professor at the Faculty of Humanities and Social Sciences, University of Pécs. Her research focuses on the study of curricula, textbooks, and teacher education.
- **Zsófia Nagy** is a student in the English and German Teacher Training Program at the Faculty of Humanities and Social Sciences, University of Pécs. Her research focuses on literary studies.
- **Zsófia P. Rétfalvi** is a PhD student at the Doctoral School of Literary and Cultural Studies, University of Pécs. Her research focuses on the biographies of Imre Madách and the reception history of *The Tragedy of Man*.
- **Zsóka Kratofil** is a student of Food Biotechnology at the Faculty of Technology, University of Novi Sad. Her research focuses on biotechnology, particularly microbiology and fermentation.
- **Zsolt Vörös** is a master's student in History at the Faculty of Humanities and Social Sciences, University of Pécs. His research focuses on the collapse of the Austro-Hungarian Monarchy at the end of World War I and its consequences, with particular attention to the Serbian occupation of Baranya.
- **Zsuzsanna Götz-Kocsis** is a PhD student at the Doctoral School of Health Sciences, University of Pécs. Her research focuses on the relationship between psychosocial factors, the digital environment, and health consciousness in relation to young adults' sexual health and behavior.
- **Zsuzsanna Szőke** is the head of the Reproductive Biology and Toxicology Group at the Institute of Genetics and Biotechnology, Hungarian University of Agriculture and Life Sciences. Her research focuses on the analytical investigation of mycotoxins.
- **Dr. Zsuzsanna Vecsei** is a research biologist at the Non-Ionizing Radiation Department, Division of Radiobiology and Radiation Health, National Public Health and Pharmaceutical Center. Her research focuses on the effects of radiofrequency radiation emitted by third and fourth-generation mobile phones on thermal pain threshold and cognitive functions.
